Re: Work Being Performed by Non-Certified Personnel

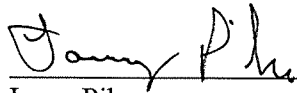

Dear Brothers and Sisters,

It has come to our attention that management engineers, either on field trips from AFW/TUL or permanently stationed in your city, have been re-racking/replacing components and physically using test equipment and meters while troubleshooting aircraft. It should be noted that these people are 1) Management, 2) NOT certified by the FAA and 3) when you sign a logbook you are signing for their work. We urge all members, especially in this time of crisis, to protect their profession and their FAA issued A&P certificate. The FAA Safety Hotline web site can be viewed at:

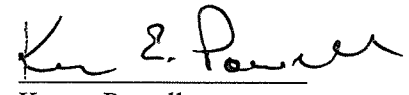

http://www.faa.gov/contact/safety_hotline/
FAA Safety Hotline telephone number (800) 255-1111
